

# NEW FOR 2023

## Ports & Facilities Annual

The Ports & Facilities Annual is a directory of port facilities, repair facilities, shipyards, intermodal yards, etc. for Calif., Ore., Wash., Hawaii, Alaska, and Guam. Including expansions, closings, new technology, and more info.

### Set your company apart

A display ad in our Ports & Facilities Annual is a great way to set your facility apart from the hundreds included in our FREE Listings.

### Expand your reach

For suppliers, naval architects, and vendors, the Ports & Facilities Annual will provide the ideal editorial environment for an ad highlighting the services and products your company provides. You'll reach commercial vessel operators as they prepare to build, repair or convert their vessels.

### Maximize your exposure

This annual edition will be distributed at all events affiliated with *Pacific Maritime Magazine* and serve as a resource available to readers all year long. With increased circulation surrounding this issue, ads featured in this edition will have greater visibility.

### Targeted audience

This issue will feature targeted editorial and distribution in the only publication specifically curated for your audience. If you sell products and services to the ports and facilities community, you will want to ensure that your company is highlighted in this special issue.

**Ad Reservations: 8/25/23**

**Materials Due: 9/1/23**
